INDEX

Page numbers of regular articles are given in boldface type

abnormal sex-ratio in *Drosophila willistoni*, maternally inherited, **59**
ABRAHAMSON, S., 497, 539
  oxygen influence, X-ray induction of structural changes, Drosophila oocytes, **173**
Abstracts of papers presented at the 1959 meeting of the Genetics Society of America, **497**
ADAMS, M. W., relationship of heterozygosity to homeostasis, maize, **777**
ADELBERG, EDWARD A., 497
alleles, additional, affecting red blood cell antigens, chicken, **955**
allelism among auxotrophs, Salmonella, **269**
allelism, complementation, pseudoallelism at dumpy locus, Drosophila, **347**
ALEXANDER, MARY L., 497
  biological damage from ionizing radiations, mature and immature germ cells, *Drosophila virilis*, **979**
alpha particles producing functionally stable broken chromosome ends, maize **279**
ALTENBURG, EDGAR, 498, 498
ALTENBURG, L. S., 498, 498
antigens, additional alleles, chicken, **955**
  erythrocyte, induced somatic mutations affecting, 533
ARONSON, MARGARET M., 499
ascites tumor, rat, development of cytoplasmic bodies, 511
asymmetry and variability in double bar-eyeless, **1101**
atypical pigment cell growth, hybrids of xiphophorin fishes, 499
ATZ, JAMES W., 499
average length of initial linkage blocks intact after *n* meiotic divisions within selected mating systems, 514

bacteria, induced mutation, macromolecular sequence, 506
bacterial chromosomes, organization of, 505
BADENHAUSEN, SUSAN, group of similar lethals in wild mice, **795**
BALBINDER, ELIAS, genotypic control kappa, Paramecium, **1227**
BALBINDER, EVELYN, transduction, galactose region of *Escherichia coli* K12, **309**
BAND, HENRETTA T., 499
BANGHAM, JEAN W., 532
BANIČ, S., transduction in Salmonella, **449**
barley, changes in amino acid content induced by the X-radiation of developing embryos, 526
BEARDMORE, J. A., environment affecting heterosis and homeostasis, **759**
BEATTY, A. V., 500
BEATTY, JEANNE W., 500
BECKER, G., 517
BECKER, H. J., 500
BECKSTROM, JANIS, 539
BEMIS, W. P., selective fertilization, lima beans, **555**
BENNETT, DOROTHEA, group of similar lethals in wild mice, **795**
BERGENDAHL, JANET, biological damage from ionizing radiations, mature and immature germ cells, *Drosophila virilis*, **979**
BIANCHI, A., 500
BINET, F. E., correlation due to linkage, **5**
biological damage, ionizing radiations, mature and immature germ cells, Drosophila, **979**
Blaberus discoidalis, selection for interchange heterozygosity, **251**
BLAKESLEE, ALBERT FRANCIS, biography of, **1**
BLUMEL, JOHANNA, 501
BONNIER, GERT, effects of homozygosity and heterozygosity on rate of development, *Drosophila melanogaster*, **679**
BOSE, SMRITIMOY, 501
BOWLING, MEL, 507
BRACHIONUS, male-producing lines and a maleless line in, 536
breakup of initial linkage blocks under selected mating systems, **857**
BREGNI, E., 542
BRILES, C. O., additional alleles, red blood cell antigens in chicken, **955**
BRINK, R. ALEXANDER, transpositions of modulator, a component of the variegated pericarp allele, maize, **725**
BRITTAIN, MADELEINE, biological damage from ionizing radiations, mature and immature germ cells, *Drosophila virilis*, **979**
BUCHERT, J. G., 501
BURDICK, A. B., 501
  single gene heterosis, Drosophila, **211**
BURNETT, JEAN B., 510
BURNS, SARAH N., 497
BURWELL, L. R., 517

CALVIN, M., 517
CAMPBELL, ALLAN, transduction, galactose region of *Escherichia coli* K12, **309**
CAPENOS, MARY ROWAN, 502
CARLSON, E. A., 502
  allelism, complementation, pseudoallelism at dumpy locus, Drosophila, **347**
CARSON, H. L., 503
cattle, blood groups, heritable exceptions in, 504
  immunogenetic studies of J substance in saliva, 539
Capsicum, linkage of fruit shape and color genes, **407**
cell size and number, relation to genetic and

environmental variation of body size, Drosophila, **869**
CHAPIN, M., 507
CHAO, CHUAN YING, heterotic effects of chromosomal segment, **657**
chemically induced instabilities in *Penicillium chrysogenum*, **137**
chiasma terminalization in a structural heterozygote in Secale, **705**
chicken, cytological demonstration of an X-ray induced chromosomal translocation, 529
nonadditive gene action on specific body tissues, 517
red blood cell antigens, additional alleles, **955**
red cell antigens, **14**
chromatographic analysis of free amino acids in blood, house mouse, **591**
chromosomal aberration, postirradiation modification of, 500
chromosome associations, random and non random, **1271**
chromosome pairing in salivary gland nuclei, *Drosophila melanogaster*, **163**
CHU, ERNEST H. Y., 503
CLARK, A. M., correlation due to linkage, **5**
CLARKE, C. A., genetics of Papilio, race *cenea*, **1347**
CLAYBERG, CARL D., precocious meiotic centromere division, Lycopersicon, **1335**
CLAYTON, FRANCES E., lozenge pseudoalleles effect on pigment development during pupal differentiation, *Drosophila melanogaster*, **1041**
CLIFFORD, H. T., correlation due to linkage, **5**
COCKERHAM, C. CLARK, partitions of hereditary variance, **1141**
COE, E. H., 504
COHN, NORMAN S., 527
Collinsia, effect of colchicine, 512
compound chromosomes involving X and Y, Drosophila, **187**
CONKLIN, P. M., 517
convergent improvement, corn, **341**
correlation due to linkage, **5**
CRARY, D. D., dachs gene effects upon growth of the skeleton, **609**
CRAWFORD, I. P., 504
Crepis capillaris, oxygen posttreatment and heterochromatin, X-ray induced chromosome aberrations, **124**
crossover rates, trans and cis arrangements, white locus, Drosophila, 498
CULP, THOMAS W., oil and protein content, seed coat type, Sesamum, **897**
cytogenetics of trisomic, *Matthiola incana*, **1083**

DATTA, S. P., 504
DAVIS, ROWLAND, asexual selection, Neurospora, **1291**
DE GIOVANNI, ROSALIE, 505
dehydration, effect on X-ray induced chromosomal rearrangements, Drosophila, **329**
DELAMATER, EDWARD D., 505
DEMARINIS, F., 505
asymmetry and variability in double bar-eyeless^2, **1101**
DEMEREC, M., Albert Francis Blakeslee, biography, **1**
allelism among auxotrophs, Salmonella, **269**
DESBOROUGH, SHARON, 535
diallel crosses, components of variation, **297**
DJORDJEVIC, B., 540
DNA incorporation, mammalian cells, tissue culture, 512
synthesis and the mitotic cycle, studied by autoradiography and microcinematography, 536
DOANE, W. W., 506
DOBZHANSKY, TH., genetic variability, *Drosophila prosaltans*, **75**
dominant lethality, Habrobracon and Drosophila, **1053**
DOUDNEY, C. O., 506
DOUGHERTY, ELLSWORTH C., 536
DOWNS, W. G., JR., 507
DRAY, SHELDON, 507
Drosophila, anomalous development of the tracheae in larvae, 536
anoxia delay in joining of X-ray induced breaks, 509
asymmetry and variability in double bar-eyeless, **1101**
biological damage mature and immature germ cells, ionizing radiations, **979**
body size, cell size and number in relation genetic and environmental variation of, **869**
busckii, divisibility of the nucleolus organizer and the structure of the nucleolus, 520
cellular constitution of wing, interrelations between genetic behavior and development in, **1113**
chromosome breakage and rejoining in irradiated sperm, 545
chromosome 4 effect on sex chromosome segregation, 514
chromosome instability in mitoses, w^{pc}, **923**
chromosome pairing in salivary gland nuclei, **163**
chromosomes from South Amherst population, 499
comparison of the incorporation of tritiated thymidine and cytidine into giant chromosome puffs, 531
compound chromosomes involving X and Y, **187**
concealed variability, *D. willistoni* and *D. prosaltans*, **1359**
crossover ratio, white alleles, 498
differential response to mutagens, **1149**
dominant lethality induced, **1053**
Dubinin effect and Y chromosome, **911**
effect of 2,4 dinitrophenol upon P^{32} loss in adult females, 545
effect of environment on heterosis and homeostasis, **759**
effect of low dose irradiation, 501
effect of X-rays on sperm activity, 545

effects of copper and iron salts, on viability and abnormal growths, 542
effects of deuterium oxide (heavy water), 517
effects of homozygosity and heterozygosity on rate of development, **679**
female sterility mutant, 506
genetic activity of Y chromosome, 499
genetic control of tyrosinase activity, 523
genotypic-environmental interactions, **1325**
genotypic expression conditioned by chemically defined medium, aseptic conditions, 515
germinal and somatic reversion of ivory, 522
hereditary material in spermatozoa, 502
heterosis in DDT resistant and susceptible populations, 527
homology of chromosome segments, **1027**
induced changes in female germ cells, effect of dehydration, **329**
induction of structural changes in oocytes, **173**
interaction of Hairless and engrailed with cubitus-interruptus-dominant and cubitus-interruptus-Wallace, 516
interchromosomal genotypic balance in inbred lines, 519
irradiated artificial populations, 503
lozenge pseudoalleles, eye pigment development, pupal differentiation, **1041**
maternally inherited abnormal sex-ratio, **59**
meiotic dicentrics and acentrics in inversion heterozygotes, 515
meiotic drive, cytogenetic basis of segregation distortion, **233**
melanotic masses induced by anoxia, 497
Minute rearrangements of yellow region, induction by X-rays, 511
mitochondria of Minute and wild type, 509
mutability of 18 Mev electrons, spermatozoa, **321**
mutagenic effects of quinacrine mustard, 530
mutagenicity of 2,5-bis-ethyleneimino hydroquinone, 498
mutants deficient in xanthine dehydrogenase, **153**
mutation rate, specific loci, 497
non-homologous pairing and crossing over, **1243**
non random association of inversions correlated with geographic distribution, 522
non random assortment of non-homologous chromosomes, **421**
origin of lethality in chromosome recombinants, 502
paramelanica, wild, non random associations of inversions, 538
persimilis, genetic variability, **43**
persimilis, lack of heterosis in experimental populations, 537
prosaltans, genetic variability, **75**
pseudoalleles at dumpy locus, **347**
pseudoalleles at white region, **34**
pseudoobscura, egg-laying rhythm, 545
quantitative inheritance of frequency of somatic crossing over, 543
radiation dose and dominant visible mutation rate, **967**
radiation effects on different strains, 517
reciprocal translocations between the X and Y chromosome, 529
release of genetic variability, **43, 75**
residual effects of parental X chromosomes on white-variegation, 537
reverse mutations at forked locus, **769**
selection limits with sibmatings, **287**
sex balance in, aneuploidy of long regions of chromosome 3, 530
sex development in intersexes, 511
single gene heterosis, **211**
somatic crossing over frequency, 505
tolerance of gonial cells for heavy X-ray doses divided into installments, 527
tumorous head, genetic mechanism of maternal effect, **471**
uric acid in, 513
virilis, localized cytochemical and submicroscopic differentiations in salivary gland chromosomes, 534
willistoni, abnormal sex-ratio, **59**
xanthine dehydrogenase, maternal effect of *ma-l*$^+$ on, **547**
zeste alleles, variegation in, 500
DUBES, G. R., 507
DUNN, L. C., group of similar lethals in wild mice, **795**
DUVICK, D. N., 508

early generation analysis of lengths of heterozygous chromosome segments around a locus held heterozygous with backcrossing or selfing, **833**
effect of metabolic processes on mutation induced by alkylating agents, 540
effects of homozygosity and heterozygosity on rate of development, *Drosophila melanogaster*, **679**
EHRLICH, ELIZABETH F., 527
ELLIS, J. R., 518
EMMERLING, M. H., 508
preferential segregation in maize, **625**
ENGLESBERG, E., 508
environment affecting heterosis and homeostasis, **759**
Escherichia coli, deuterium oxide effects, 505
factors influencing postirradiation appearance of mutants, 523
gene transfer in one mating type, 544
K12, mutants of the F factor, 515
B/r, mixed gene loci controlling L-arabinose isomerase and L-ribulokinase activities, 508
protein alterations, 504
recombination and segregation in *Gal* heterogenotes showing position effect, 528
transduction of galactose region by phages, **309**
tryptophan-independent strain from tryptophan-requiring mutant, **105**
variant sex factor, 497

FABERGÉ, A. C., 509
alpha particles, production of functionally stable broken chromosome ends, maize, **279**
FAHMY, MYRTLE J., differential gene response, mutagens, Drosophila, **1149**
FAHMY, O. G., differential gene response, mutagens, Drosophila, **1149**
FALK, R., 509
FANALE, L. P., 497
FARNSWORTH, MARJORIE W., 509
fish, genetic control of pigment cell growth, 499
sex-reversal in genotype males, induced, **739**
FLING, M., 516
flower color, genic control of anthocyanins and flavonols in petals, *Impatiens balsamina*, **787**
FORSTHOEFEL, PAULINUS F., 510
FOX, ALLEN S., 510
FROST, HOWARD B., cytogenetics of a trisomic of *Matthiola incana*, involving a ring chromosome and somatic instability, **1083**
FRYE, SARA H., 511
FUCHS, MORTON S., 510
FUNG, SUI-TONG, 511

GABELMAN, W. H., 544
GAITHER, NENITA, 520
GALINSKY, I., 511
GALL, J. G., 512
GARBER, E. D., 512, 543
GARDNER, E. J., maternal effect for tumorous head, Drosophila, **471**
GARNER, ELDON J., 542
GARTLER, S. M., 512
gene conversion of cysteine mutants, Neurospora, **647**
gene, number, controlling time of maturity in *Zea mays*, **713**
genetic variability, release through recombination, **43, 75, 93**
GERSH, EILEEN SUTTON, chromosome pairing, salivary gland, Drosophila, **163**
GERSTEL, D. U., 513
GILES, NORMAN H., 503
GILMOUR, D. G., determining red cell antigens in chickens, **14**
GLASSMAN, EDWARD, maternal effect of *ma-l*$^+$, xanthine dehydrogenase, Drosophila, **547**
mutants deficient in xanthine dehydrogenase, **153**
GOWEN, JOHN W., 511, 513
GRAF, G. E., 513
GREEN, M. M., non-homologous pairing and crossing over in *Drosophila melanogaster*, **1243**
reverse mutations at forked locus, Drosophila, **769**
GRELL, RHODA F., 514
non random assortment of non-homologous chromosomes, Drosophila, **421**
Dubinin effect, **911**
group of similar lethals in wild mice, **795**
GRUN, P., 514
guinea pig, genetics of silvering, **387**
silvering, diminution of coat color and male sterility of white or near-white, **563**
variations in intensity of genotypes, **1001**
GUTIERREZ, MARIO G., maize, randomness of mating in isolated polycross plantings, **1075**
GUZMAN, M. A., 542

HAAS, F. L., 506
Habrobracon, dominant lethality induced, **1053**
retention of calcium^{45} in sperm, 539
HAGEN, CHARLES W., JR., flower color, genic control of anthocyanins and flavonols in petals, *Impatiens balsamina*, **787**
hamster, stable *in vitro* system having maximum proliferating ability, 546
Chinese, sex chromosomes, 519
HANSON, W. D., 514
breakup of initial linkage blocks under selected mating systems, **857**
early generation analysis of lengths of heterozygous chromosome segments around a locus held heterozygous with backcrossing or selfing, **833**
theoretical distribution of initial linkage block lengths intact in gametes of population intermated for n generations, **839**
theoretical distribution, parental gene blocks in gametes, **197**
HARRISON, E., genetics of reaction to pepper vein-banding virus, **1281**
HAVERLAND, LOREN H., 513
HAWTHORNE, D. C., 531
HeLa, karyotype and phenotype in cloned lines, **1257**
hereditary variance, partitions of, **1141**
HERSKOWITZ, I. H., mutability of 18 Mev electrons, Drosophila spermatozoa, **321**
induced changes in female germ cells, Drosophila, effect of dehydration, **329**
heterochromatin and induced chromosome aberrations in Crepis, **124**
heterosis, single gene, Drosophila, **211**
heterotic effect of chromosomal segment, **657**
HEYNE, E. G., differential sensitivity of monosomic X and the disomic to X-irradiation, **933**
differential sensitivity of 16 monosomics and disomic to single dosage, X-irradiation, **947**
HINTON, CLAUDE W., 515
chromosome instability in cleavage mitoses, Drosophila, **923**
HINTON, TAYLOR, 515
HIRAIZUMI, YUICHIRO, meiotic drive in natural populations, Drosophila, **233**
HIROTA, Y., 515
homology, terminal portion of Zea chromosome 2 and chromosome segment derived from Tripsacum, 524

HOROWITZ, N. H., 516
HOUSE, VERL L., 516
HRUBANT, H. E., 516
free amino acids in blood plasma of inbred mouse, **591**
HUGHES, A. M., 517
human, blood groups in Mayan population, 542
radiation sensitivity of chemically modified cells, 540
IKEDA, YONOSUKE, bisexual mating reaction, Saccharomyces, **375**
immobilization of antigens, Paramecium, **803**
interrelations between genetic behavior and cell constitution, Drosophila, **1113**
irradiation, interaction of localized and randomized chromatid breaks produced by X-rays and radiomimetic compounds, 527
IRWIN, M. R., 504
additional alleles, red blood cell antigens in chicken, **955**
ISHITANI, CHIYOKO, linkage data, Neurospora, **1209**
IVES, P. T., 499, 517
radiation dose and dominant visible mutation rate, Drosophila, **967**
JAAP, R. G., 517
JAMES, A. P., 518
severity of mutant effects, haploid effects in yeast, **1309**
JANICK, JULES, 518
JINKS, J. L., diallel crosses, components of variation among family means, **297**
JOHN, B., interchange heterozygosity in inbred Blaberus, **251**
JONSSON, ULLA B., effects of homozygosity and heterozygosity on rate of development, *Drosophila melanogaster*, **679**
JUDD, B. H., position pseudoalleles at white in Drosophila, **34**
KALTER, H., 518
KAPLAN, W. D., 519
KATO, REI, 519
KELLER, EDWARD C., JR., 519
KIKUDOME, GARY Y., 520
phenomenon of preferential segregation, maize, **815**
KILLEEN, N. L., 508
KIMBALL, R. F., 520
KRAWINKEL, M. E., 501
KRIMBAS, COSTAS B., comparison of concealed variability, *Drosophila willistoni* and *Drosophila prosaltans*, **1359**
KRIVSHENKO, JAKOV, 520
homology of short euchromatic elements of X and Y chromosomes of *Drosophila busckii* with the microchromosome of *Drosophila melanogaster*, **1027**

LA CHANCE, LEO E., 521, 539
LARISON, L., 535
LATTERELL, RICHARD L., 521
LAUGHLIN, JOHN S., mutability of 18 Mev. electrons, Drosophila spermatozoa, **321**
LEFEVRE, G., JR., reverse mutation studies on the forked locus in *Drosophila melanogaster*, **769**
LEONARD, MARY J., 546
LESLEY, MARGARET M., cytogenetics of a trisomic of *Matthiola incana*, involving a ring chromosome and somatic instability, **1083**
LEVENE, H., genetic variability, *Drosophila prosaltans*, **75**
genetic variability, statistical theory, **93**
LEVITAN, M., 522
LEWIS, E. B., 522
LEWIS, H. S., 523
LEWIS, H. W., 523
LEWIS, K. R., interchange heterozygosity in inbred Blaberus, **251**
LIEB, M., 523
Lilium, cytoplasmic incorporation of thymidine during meiosis and premeiosis, 541
lima beans, selective sterilization in, **555**
LINDEGREN, C. C., 535
LINDSLEY, D. L., 529
compound chromosomes, X and Y, Drosophila, **187**
LOCKE, WARREN F., cytogenetics of a trisomic of *Matthiola incana*, involving a ring chromosome and somatic instability, **1083**
lozenge, pseudoalleles, pigment development during pupal differentiation, **1041**
LUCCHESI, JOHN C., 515
Lycoris, chromosome fusion and fragmentation, 501

MA, TE-HSIU, 523
MACLEOD, H. L., 516
MACRAE, EDITH KRUGELIS, 524
MAGUIRE, MARJORIE P., 524
maize, changes in radiosensitivity of chromosomes during seed germination, 521
convergent improvement, **341**
cytoplasmic males-sterile, genic restorer of fertility, 508
functionally stable broken chromosome ends produced by alpha particles, **279**
gamma radiation, cytogenetic studies, 523
heterotic effect of chromosomal segment, **657**
heterozygosity and homeostasis relationship, **777**
Italian, new type chromosome 7, 500
modulator, component of variegated pericarp, **725**
phenomenon of preferential segregation, 520
pollen abortion, restoration of cytoplasmic male sterility, 501
preferential segregation, **815**
preferential segregation of structurally modified chromosomes, **625**
randomness of mating, **1075**
time of conversion-type event, B locus, 504
male sterility of white or near-white combination of *si* and *dm*, guinea pig, **563**
MALING, BARBARA, 525
linkage data, Neurospora, **1215**

Malogolowkin, Chana, maternally inherited abnormal sex-ratio in Drosophila, **59**
man, chromosome aberrations, induced by X-rays, somatic cells, 503
congenital cataracts and cerebral palsy in siblings, 501
Margolin, Paul, 525
Mark, Abraham M., estimation of mutation rate, **483**
Martin, Albert, Jr., 526
maternal effect for tumorous head, genetic mechanism, Drosophila, **471**
mating type frequencies, Tetrahymena, genetic factors affecting, **1173**

Megnet, Roland, 526
meiosis in triploid maize-teosinte hybrids, 542
meiotic drive in natural populations, *Drosophila melanogaster*, **233**
melanotic masses induced by anoxia, Drosophila, 497
Mericle, L. W., 526
Mericle, Rae Phelps, 526
Merrell, David J., 527
Merz, Timothy, 527
Meyer, Helen U., 527
mice, cataract as affected by radiant energy, 538
dwarfs in C57, 507
Mitchell, Donald F., 519
Mitchell, H. K., maternal effect on *ma-l+*, xanthine dehydrogenase, Drosophila, **547**
mutants deficient in xanthine dehydrogenase, **153**
Mitchell, Mary B., analysis of Neurospora cross, **847**
Mohamed, Aly H., gene, number, controlling time of maturity in *Zea mays*, **713**
monohybrid segregation, **1131**
Morpurgo, Giorgio, chemically-induced instabilities, *Penicillium chrysogenum*, **137**
manganous chloride action on induced somatic segregation, Penicillium, **437**
spores inactivated by nitrogen mustard, reactivated by manganous chloride, **1371**
Morse, M. L., 528
mouse, correlated responses to selection for blood-pH, 544
differences in free amino acids in the blood plasma of three inbred strains, 516
free amino acids in blood, chromatographic study, **591**
influence of uterine position and other factors on the occurrence of spontaneous cleft lip, 542
radiation response, heterosis as a factor, 513
seasonal variation in frequency of cortisone-induced cleft palate, 518
second group of similar lethals, wild populations, **795**
Springville luxoid anatomy and development, 510
variegated-type position effects in, 532
Mueller, Jo Anne, 533
Mukai, T., 501
single gene heterosis, Drosophila, **211**
Muller, H. J., 527
mutability of 18 Mev electrons, Drosophila spermatozoa, **321**
Mundkur, Balaji, 528
Murray, M. W., 517
Murty, B. R., asynapsis in plants, random and non random chromosome associations, **1271**
mutagenicity of 2,5-bis-ethyleneimino hydroquinone, Drosophila, 498
mutagens, differential gene response in Drosophila, **1149**
mutants deficient in xanthine dehydrogenase, *Drosophila melanogaster*, **153**
mutation rate, estimation of, yeast, **483**
radiation dose and dominant visible mutation rate, Drosophila, **967**

Nanney, D. L., 529
mating type frequencies, Tetrahymena, **1173**
Neurospora, alteration of crossing over by analogues by thymine and phenylalanine, 525
analysis of a cross, **847**
asexual selection, **1291**
comparative complementation and genetic maps of *hist-3* locus, 543
gene conversion at the *nic-2* locus in crosses between strains with normal chromosomes and a strain carrying a translocation at the locus, 532
gene conversions, **647**
linkage data, **1209, 1215, 1221**
multigenic control of tyrosinase synthesis, 516
new markers, linkage data, **1185**
relationship of gene conversion to crossing over, 538
tyrosinases separable, interconversion, 510
